About One-Click

“One-Click” is a high-speed trading feature that gives you full flexibility to open, close, close-and-reverse or close all positions of the same currency pair with just a single tab.

※One-Click is an instantaneous trading function for placing market orders only.

Before you place your trade using One-Click, we highly recommend you to practise executing One-Click trades with our demo-trading platform.

Unique Features of One-Click Trade

▼With a single tab

Place a Market Order with One-Click - this feature allows you to instantaneously submit a Market Order without any verification window. This enables you to get in and out of position quickly with less price fluctuation.

▼Close All positions of each currency pair with a single tab

Click on “Close ALL” button to close all (both long and short) positions for the selected currency pair.

▼Position status at a glance

You can view the current quote, number of positions held, average opening price, unrealised profit or loss (in pips) and the net profit or loss amount (in Hong Kong dollars) on all positions at real-time for selected currency pair. With all essential information shown in a single window, you can trade faster without missing a chance.

2. Before Getting Started

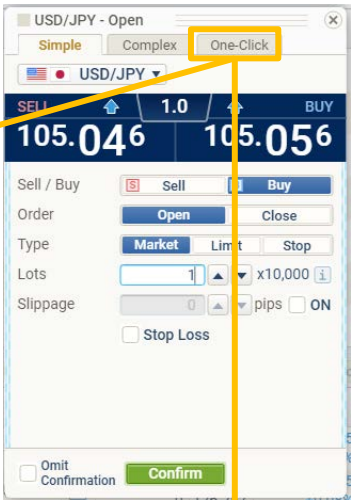

a. Using One-Click Feature

To use One-Click feature, simply go to Z.com Trader Web > TRADES:

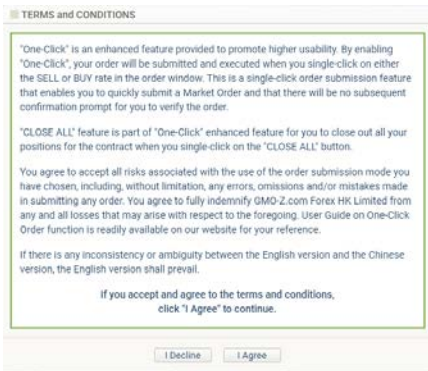

Switch "ON" to activate One-Click mode

Click on "One-Click" tab

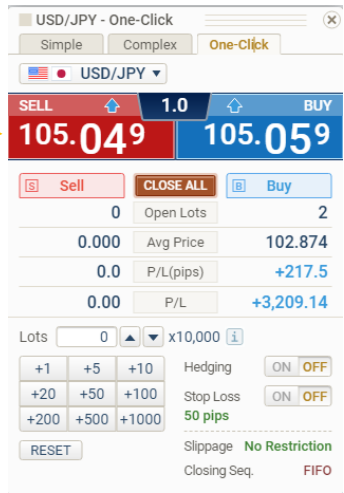

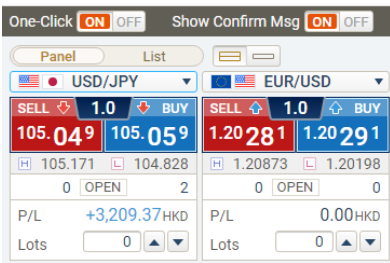

OR
First time

Second time onwards

Terms and Conditions
"One-Click" is an instantaneous order feature with no subsequent confirmation prompt. By agreeing to this warning message, you fully understand the use of this order feature and is subject to higher risks of possible incorrect use of this order feature.

Second time onwards

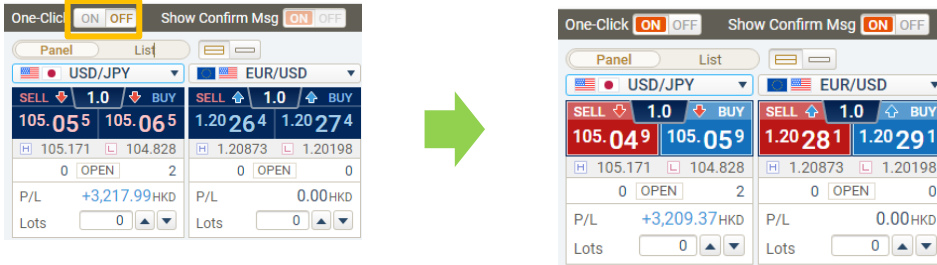

2. Before Getting Started

b. One-Click Feature on Z.com Trader Web

Ways to activate One-Click order mode:

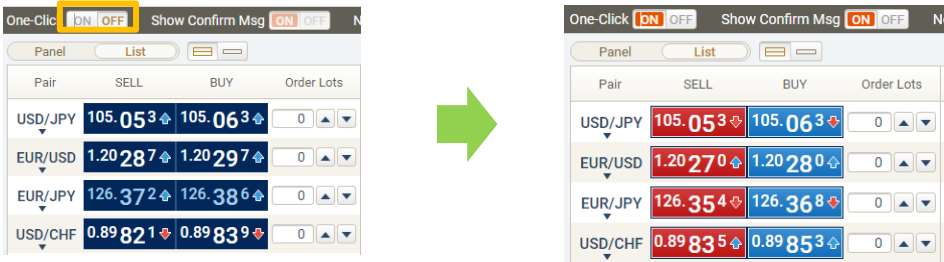

i. Price Panel View

Switch to "ON"

ii. Price List View

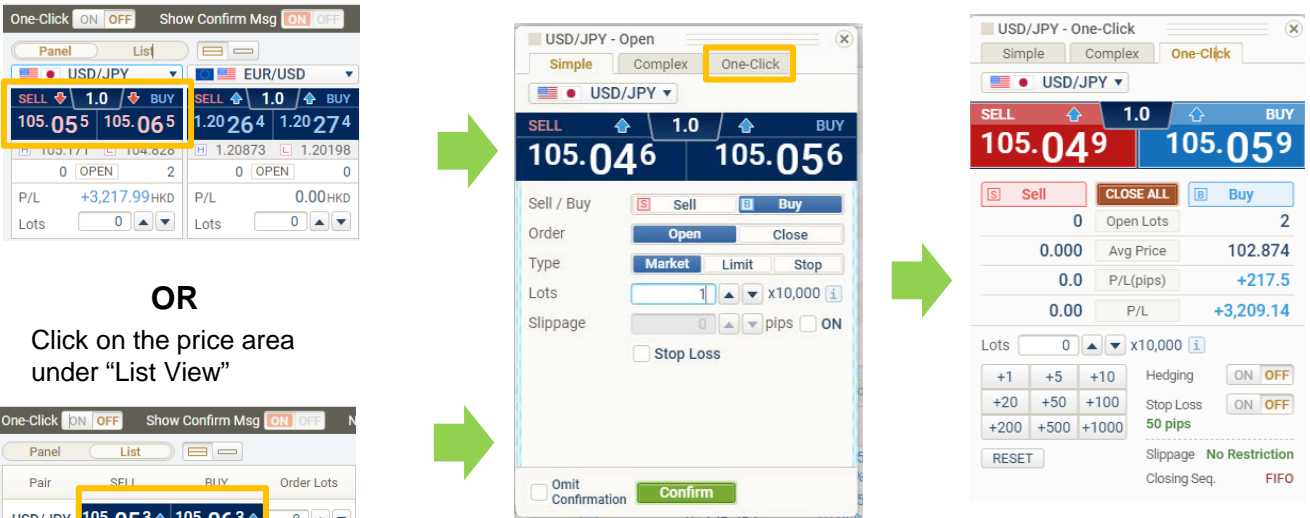

Switch to "ON"

iii. Pop-Up Order Panel

Click on the price area under "Panel View"

Click on "One-Click" tab

OR

Click on the price area under "List View"

2. Before Getting Started

b. One-Click Feature on Z.com Trader Web

Ways to activate One-Click order mode:

iv. Pop-Up External Order Panel

Click on the price area under "Panel View"

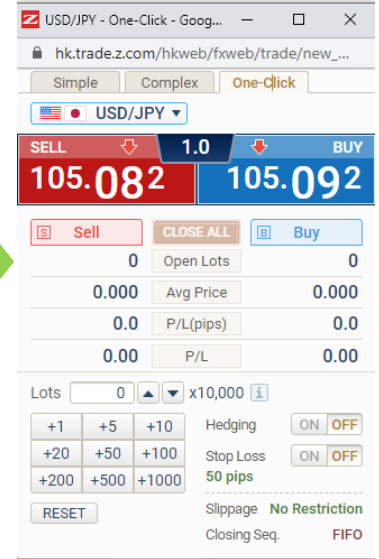

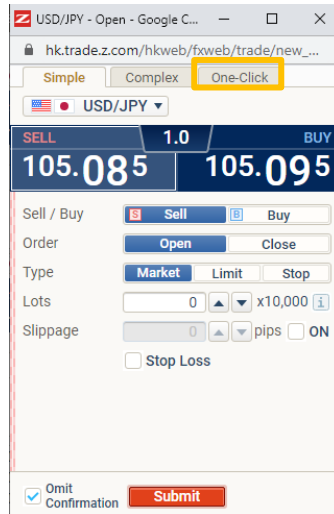

OR

Click on the price area under "List View"

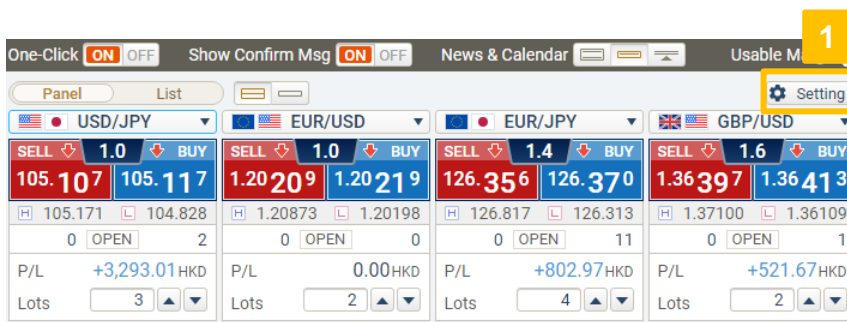

Click on "One-Click" tab

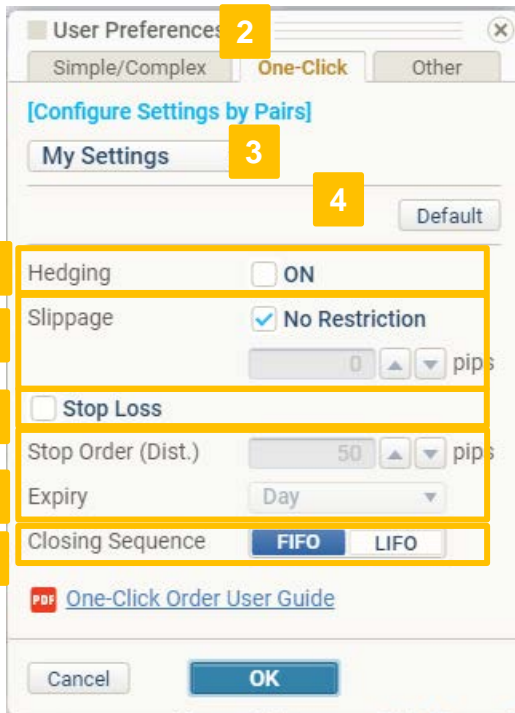

c. User Preferences

Before using One-Click, please preset your order settings such as slippage allowed for each currency pair.

1 User Preferences
Click **Setting** button on the top right corner above the Price Panel.

2 One-Click Settings
Select "One-Click" tab.

3 Customise Settings for Currency Pairs
Present common order settings under "My Settings" for selected or all currency pairs.

Point: You may also save settings for each currency pair by selecting from the drop-down list.

4 Default Settings
Click to restore to default settings. Default settings are as shown on the left.

5 Hedging
Check to enable hedging mode for One-Click.

6 Slippage
Check "No Restriction" if you do not wish to set any slippage limit. Otherwise, remove check and enter the maximum slippage allowed in pips.

Important to Note: If the slippage limit is too low, your order may not be executed when market is volatile and market rate has fluctuated beyond the limit after you placed your order.

7 Stop Loss
Check to enable stop loss order for every One-Click trade.

8 Stop Order Distance and Expiry
Set stop loss distance, in pips, from the market price and select expiry type for the stop loss order: "Day", "GTF" or "GTC".

Important to Note: Stop Loss order is applicable to One-Click trades executed from "Pop-Up Order Panel" ONLY.

9 Closing Sequence
Select the order you would like to have your positions closed when using One-Click: FIFO (first in, first out) or LIFO (last in, first out).

d. Layout [Price Panel]

1 One-Click Mode

Click to switch “ON” or “OFF” One-Click order mode.

2 Currency Pair

Select currency pair from drop-down list to show latest sell/buy price.

3 Order Button

Place a market order with just a single click on either SELL/BUY button.

4 Position Summary

Shows your current position summary for the chosen currency pair.

OPEN : Total number of trade lots held
P/L : Current net profit or loss amount shown in Hong Kong dollars

5 Order Lots

Enter the intended trade size in lots. Value entered will remain as the default order lot size until it is changed.

Important to Note:

Stop loss order preset under Settings will NOT be applicable to One-Click trades executed from “Price Panel”. To open trade with stop loss order using One-Click, please do so from “Pop-Up Order Panel”.

2. Before Getting Started

d. Layout [Pop-Up Order Panel]

The screenshot shows the 'USD/JPY - One-Click' order panel. It features a currency pair dropdown (1) set to USD/JPY. Below it are 'SELL' and 'BUY' buttons with a price of 105.046 and 105.056 respectively (2). A 'CLOSE ALL' button is located between the buttons (4). A position summary table (5) displays: Open Lots: 2, Avg Price: 102.874, P/L(pips): +217.2, and P/L: +3,204.95. A lot size selector (6) is set to 0. The settings panel (7-9) includes: Hedging (ON/OFF), Stop Loss (50 pips, ON/OFF), Slippage (No Restriction), and Closing Seq. (FIFO).

This screenshot shows the 'USD/JPY - One-Click' order panel with updated prices and settings. The 'SELL' button now shows 105.096 and the 'BUY' button shows 105.106. The 'CLOSE ALL' button is still present. The position summary table (5) now shows: Open Lots: 2, Avg Price: 102.874, P/L(pips): +222.2, and P/L: +3,277.28. The lot size selector (6) is now set to 3. The settings panel (7-9) remains the same: Hedging (ON/OFF), Stop Loss (50 pips, ON/OFF), Slippage (No Restriction), and Closing Seq. (FIFO).

- 1 Currency Pair**
Select currency pair from drop-down list to show latest sell/buy price.
- 2 Order Button**
Place a market order with just a single click on either SELL/BUY button.
- 3 Spread**
Shows current spread, the price difference between SELL and BUY price.
- 4 Close All**
Click "CLOSE ALL" button to close all positions (including those with pending close orders) for the selected currency pair.
- 5 Position Summary**
Shows your current position summary for the chosen currency pair.

- Open Lots** : current no. of positions held (including those with pending close orders)
- Avg Price** : average open price for long or short positions
- P/L (pips)** : price difference (in pips) between current price and average open price
- P/L** : unrealised net profit or loss amount in Hong Kong dollars

- 6 Order Lots**
Enter the intended trade size in lots. Value entered will remain as the default order lot size until it is changed.
- 7 Hedging**
Click to enable or disable hedging mode. To customise the default hedging mode, please go to [Setting](#)
- ON** : you can only open trades with the sell or buy button
- OFF** : you can open or close trades by tapping on the sell or buy button

- 8 Stop Loss**
Click to enable or disable Stop Loss order. To change the Stop Loss distance (in pips), please go to [Setting](#)

- 9 Slippage Limit and Closing Sequence**
Display your current settings. To change, please go to [Setting](#)

2 All positions for the selected currency pair have been closed.

Risk of trading in leveraged foreign exchange contracts

The risk of loss in leveraged foreign exchange trading can be substantial. You may sustain losses in excess of your initial margin funds. Placing contingent orders, such as "stop-loss" or "limit" orders, will not necessarily limit losses to the intended amounts. Market conditions may make it impossible to execute such orders. You may be called upon at short notice to deposit additional margin funds. If the required funds are not provided within the prescribed time, your position may be liquidated. You will remain liable for any resulting deficit in your account. You should therefore carefully consider whether such trading is suitable in light of your own financial position and investment objectives.

Risk of electronic trading

Trading on an electronic trading system may differ from trading on other electronic trading systems. If you undertake transactions on an electronic trading system, you will be exposed to risks associated with the system including the failure of hardware and software. The result of any system failure may be that your order is either not executed according to your instructions or is not executed at all.
