Section TWO: Drawing Tools and Technical Analysis

I. **Drawing Tools**

You could draw trend lines or various shapes through drawing tools. The drawing tools buttons are shown in the red border below. Some drawing tools have keyboard shortcut shown on the right.

| Default Save Layout | Panel 📐 🖌 🤇 | Ç _{A∥} — ∣ -⁄ | 14 | ○∡ △ □ ◇ ☰ ∠ 🗹 |
|---------------------------|--------------------|------------------------|----|----------------------------|
| USD / JPY 15 m | Standard Cursor | | Α | Fibonacci Channel |
| 💷 Σ Simple Moving Average | Delete | | ്ട | Fibonacci Time Zones |
| | Delete All | | D | Fibonacci Arc |
| 23:45 | Horizontal Line | | Q | Fibonacci Expansion |
| 103.311 | Vertical Line | | w | Gann Line |
| | Trendline | | Е | Gann Fan |
| | Channel Line | | R | Gann Grid |
| | Circle | | े1 | Ellipse |
| | Trendline by Angle | e 1 1 | 2 | Simple Arrow |
| 23:15 102.996 | Triangle | | 3 | Double-headed Arrow |
| | Rectangle | | 4 | Linear Regression Channel |
| | Pentagon Chart | | 5 | Equidistant Channel |
| | Fibonacci Retrace | ment | 6 | Standard Deviation Channel |
| | Fibonacci Fan | | 7 | Insert Comment |

Main drawing tools:

Horizontal Line: For marking resistance and support levels, you could add a horizontal line at desired position after clicking the button and click the line in the desired position.

Trend Line: Use to indicate the current price trend, you could click the starting point and end point after click the "Trend Line" button

// Channel Line: Use to indicate the upward/downward channels. After clicking the channel line button, firstly, choose the starting point and end point of one end of the channel, then a parallel line is shown, you could then select the width of the channel by fixing the position of the parallel line.

Trend line by angle: Use to determine the strength of current trend. After clicking the button, choose the starting and end points of the trend you would like to measure. Then the angle will be shown beside the starting point.

Rectangle: Same usage as channel line. Please refer to the explanation for the channel line. 5 Feb 2021 Copyright © GMO-Z.com Forex HK Limited All rights reserved.

Circle: Choose the centre position of the circle, and determine the radius to fix the size

Triangle: Use to determine the consolidation of the previous uptrend/downtrend. Firstly choose the starting point and end point of the trend line, and then determine the vertex by clicking the desired position.

Pentagon: Firstly, choose the centre of the pentagon, then move the cursor to determine the size of the first pentagon, after that, you could determine the position of multiple pentagons afterwards by clicking the desired position. Double-clicking the left button will end the drawing

process. If you would like to move the pentagons, please click button and drag the drawn objects to move, you can also click the green spot between the pentagons to change the size.

Fibonacci Retracement: Use to estimate the correction after a uptrend/downtrend, with the use of golden ratios. Choose the starting and end point of the desired position, then a set of horizontal lines will be drawn, with preset golden ratio parameters.

Fibonacci Fan: Same usage of Fibonacci Retracement, however, the retracement lines are shown in a set of diagonal lines.

* There are others tools could be chosen in the drawing tools, simply click button to choose, they include:

- I. Fibonacci Extension, Arc, Time Zone and Channels
- II. Gann Fans, Line and Grid
- III. Linear Regression, Equidistant and Standard Deviation Channels
- IV. Single and Doubled-headed Arrow
- V. Comments (plain text)

* To erase single drawn object, please click the 🖉 button and click the object to be deleted after

the cursor changed to a square. You could also erase all drawn object by clicking the button.

Right-click drawn object, and you can change colour and thickness of lines.

II. Economic Calendar

Major economic indicators and events coming out will be shown in this window, arranged according to date and time of release. The previous value, market consensus/forecast will also be shown.

You can also filter different countries/areas

Section FIVE: Risk Disclaimer

Risk of trading in leveraged foreign exchange contracts

The risk of loss in leveraged foreign exchange trading can be substantial. You may sustain losses in excess of your initial margin funds. Placing contingent orders, such as "stop-loss" or "limit" orders, will not necessarily limit losses to the intended amounts. Market conditions may make it impossible to execute such orders. You may be called upon at short notice to deposit additional margin funds. If the required funds are not provided within the prescribed time, your position may be liquidated. You will remain liable for any resulting deficit in your account. You should therefore carefully consider whether such trading is suitable in light of your own financial position and investment objectives.

Risk of electronic trading

Trading on an electronic trading system may differ from trading on other electronic trading systems. If you undertake transactions on an electronic trading system, you will be exposed to risks associated with the system including the failure of hardware and software. The result of any system failure may be that your order is either not executed according to your instructions or is not executed at all.
